Social Networks and Recommendation Systems - course regulations, winter semester 2021/2022

◆ The course consists of a lecture ($15h$) and a project ($45h$).

◆ During the semester you can get up to 100 points for your projects: during classes $1-11$ there will be small tasks (worth 5 points per week), which you should present one week later at the latest; during classes 12. and 13. there will be small projects to hand in with one week delay (each worth 10 points); classess 14 and 15 in total will be devoted to a larger project on a self-selected topic (for 25 points after the results will be presented in the form of a presentation).

◆ During classes $1-11$ students choose tasks on their own. Each task has a point value expressed as a fraction of 5 points. The final result from the given classes is the sum of the points thus obtained, but if this number is greater than 5, it is rounded to 5, unless one of the chosen tasks has been rated at least 2 points (40%), then the final score is not rounded and may exceed 5 points.

◆ During the last lecture, there will be a complex network knowledge test for which you will be able to score up to 20 points.

◆ The final grade for the subject is determined on the basis of the sum of the points obtained according to the scale

$$(50, \ 60] \Rightarrow 3.0, \ (60, \ 70] \Rightarrow 3.5, \ (70. \ 80] \Rightarrow 4.0, \ (80, \ 90] \Rightarrow 4.5, \ (90, \ \infty) \Rightarrow 5.0.$$
